

Wood and Finishes - all woods are oil finished except those indicated for outdoor.

Our standard finish is a hand applied linseed oil formula that is water resistant and impervious to alcohol and food acids. Linseed oil penetrates the wood surface to continue its aging process while enhancing the wood's natural subtleties, becoming more beautiful over time. Any signs of wear disappears when a thin coat of maintenance oil is rubbed in.

We add and subtract from our finish selections from year to year; if you've seen a finish in our product galleries not shown below, please inquire and we will be happy to quote.

Finishes are available in matte, low luster, and high luster.

## Ash - Based Priced Woods

Bleached Ash

Natural Oiled Ash

Fumed Ash

Mink Ash
